

Jianxin You

EDUCATION

Mila (Quebec AI Institute) & Université de Montréal

Jan. 2026 – Present

M.Sc. in Computer Science; GPA: 4.0/4.0; Supervisor: Prof. Bang Liu

Montreal, QC

Université de Montréal

Sept. 2019 – Aug. 2023

B.Sc. in Computer Science; GPA: 3.8/4.0. Prior studies in Mathematics & Economics (76 credits)

Montreal, QC

PUBLICATIONS

Peer-Reviewed

- Motahareh Sohrabi, **Jianxin You**, Simon Lacoste-Julien, Eduard Gorbunov, Gauthier Gidel. *Accelerated and Stable Convergence with Anchored Generalized Optimistic Method*. International Conference on Machine Learning (**ICML 2026**). [arXiv]
- **Jianxin You**, Kun Ni. *Adaptive Merging for Storage-Efficient Multi-Vector Visual Document Retrieval*. ACM International Conference on Information and Knowledge Management (**CIKM 2026**).
- Hetong Dai, Kundi Yao, Felix Li, **Jianxin You**, Qianyun Shen, Weiyi Shang. *LPB-Gen: Systematic Large Log-Parsing Benchmarks Generation*. ACM Transactions on Software Engineering and Methodology (**TOSEM**), accepted. [DOI]

Preprints

- Yizhan Li, **Jianxin You**, Mengyang Xiong, Yinhuan Chen, Zicheng Zhao, Dekun Wu, Dongqing Zhang, Bang Liu. *ReactHuman: A Physics-Grounded Benchmark for Human-Like Reactive Decision-Making in Embodied Multimodal LLMs*. Under review at **AAAI**.
- Doseok Jang, **Jianxin You**, Armin Zolfagharidariani. *Learning When to Spawn Subagents for Repository-Level Code Editing*. Preprint.

PROFESSIONAL EXPERIENCE

Ericsson

Jan. 2025 – Apr. 2026

Machine Learning Research Engineer Intern

Montreal, QC

- Built an **image-based multimodal RAG** system (region-level retrieval + VLM grounding), improving **retrieval and answer accuracy by 30%** over text-only baselines.
- Integrated the system into Ericsson Ultra Compact Core (**UCC**) to enable agentic troubleshooting via multimodal document understanding; deployed across **three internal teams**.

Mila — Quebec Artificial Intelligence Institute

Oct. 2024 – Oct. 2025

Research Assistant, advised by Prof. Gauthier Gidel

Montreal, QC

- Co-authored (second author) our **ICML 2026** paper on anchored generalized optimistic methods for minimax optimization; led empirical validation and supported convergence analysis.
- Derived the **primal form** of the accelerated algorithm and established convergence guarantees in stochastic and deterministic bilinear games.

McGill University — CaTS (Clinical and Translational Science) Lab

Oct. 2023 – Oct. 2024

Software Developer (Supervisor: Prof. Pablo Rusjan)

Montreal, QC

- Built and deployed a participant data-collection app (saving **~2 hours per participant**) and a PET/MRI **data-management and preprocessing pipeline** supporting downstream ML experiments.

University of Waterloo — SENSE Lab

Aug. 2023 – May 2024

Research Assistant (Supervisor: Prof. Weiyi Shang)

Waterloo, ON

- Worked on **Logram**-based n-gram log parsing (up to **5×** faster than prior parsers) and log template consolidation; the work contributed to **LPB-Gen**, accepted at **TOSEM**.

AWARDS & SCHOLARSHIPS

- **DIRO Excellence Scholarship** — Université de Montréal, 2023
- **UdeM Excellent International Student Exemption Scholarship** — Université de Montréal, 2019–2023
